University: Shatt Al-Arab
College: Engineering
Department: Civil Engineering
Stage: 3rd stage
Lecturer name: Dr. Ihsan Qasim
Academic title: Assistant Professor

Course Weekly Outline

Name	Dr. Ihsan Qasim Mohammed			
E-mail address	ihsanqasim@sa-uc.edu.iq			
Course name	Soil Mechanics-2			
Course objective	The course aims to present the characteristics of soil used in civil engineering works and how to deal with different types of soil as a construction material and support medium for the foundations of buildings.			
Course description	1. Preparing and qualifying specialized engineers to meet the requirements of the labor market in its private and public sectors in civil engineering through diversification in methods of learning and teaching and training students to apply the acquired knowledge and skills to solve realistic problems. 2. Providing distinguished academic programs in the field of civil engineering, both theoretical and practical, that comply with international standards of academic quality and meet the needs of the labor market. 3. Encouraging and developing scientific research in the fields of civil engineering in general. 4. Preparing a stimulating environment for faculty members to develop their knowledge and educational and research skills. 5. Building and developing partnership with the governmental and private sectors and society in all its various institutions.

Week No.	Theoretical	Experimental	Aims Lecturer name: Dr. Ihsan Qasim Academic title: Assistant Professor University: Shatt Al-Arab This module covers a wide range of topics in soil mechanics in order to offer basic knowledge and foundations applicable to various civil engineering problems.
1	In situ stresses	Cosolidation test	
2	Compressibility of soil	Cosolidation test	
3	Compressibility of soil	Shear box test	
4	Compressibility of soil	Unconfined test	
5	Compressibility of soil	Triaxial test	
6	Compressibility of soil	Triaxial test	
7	Shear stress	Triaxial test	
8	Shear stress	Triaxial test	
9	Shear stress	Triaxial test	
10	Shear stress		
11	Shear stress		
12	Soil lateral pressure		
13	Soil lateral pressure		
14	Soil lateral pressure		
15	Soil lateral pressure
